Get your Skin ready

Get your Skin ready

Maximise your business growth by driving pre & post skin procedure treatments.

Offer your patients a fully complete skincare experience and support them every step of the way.

Key Value 1 - Improve your post skin procedure treatment results

How: Regen4D.HA Collection is a comprehensive set that keeps pre- and post-procedure skin feeling clean and hydrated. Offering five formulas, this collection includes potent, natural active ingredients which help to boost the skin's natural regeneration process and help maintain its optimal health and hydration.

Key Value 2 - Increase customer/patient loyalty

How: Offering a fully comprehensive pre & post skin procedure follow up. Get your customers to come back to your business for Regen4D.HA collection refills.

Key Value 3 - Attract new clients

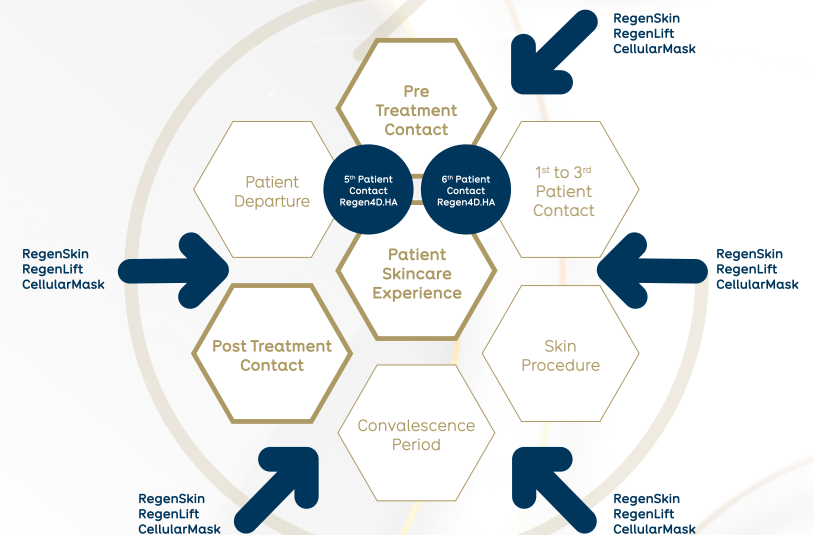

How: You offer a more complete skincare experience as compared to your competitors. Selling new unique cosmetic products that are only available for B2B professionals.

Key Value 4 - Increase your aesthetic/plastic surgery revenue

How: By offering more value to your patients through pre and post skin procedure treatments.

Build a loyal customer base

Happy clients are loyal and with this in mind, you can create a complete package of services for your patients, which on top of the initial appointment, can incorporate multiple return visits to monitor and review skin treatment results.

Deliver a full skincare experience

Bring value to your patients at multiple touchpoints during their skincare journey with you. Maintain contact and build value with your patients during entire process as you assure pre and post skin care treatments. Moreover, you can significantly extend your patients customer journey to more than just one post treatment check-up.

Engage with your patients on a more personal level

The Regen4D.HA cosmetic collection will simply add-on to your current skin services and offer you a more personal and consumer friendly way to engage with your patients during each visit. Engaging on a more personal level leads to highly personalized recommendations/advice/tips that are tailored to their specific pre and post treatment routines.

Regen4D.HA collection was developed to support your business

We are bringing new pre & post skin treatment services that are easy to implement into your current business processes with the aim to drive the very best skin results.
